EXOJO is a family business with over 65 years of experience and nationally recognized prestige in the production of ducts and accessories for ventilation and smoke and gas evacuation.

We have a dynamic and innovative spirit that keeps us constantly evolving, sparing no effort, both human and financial, to remain at the forefront of technology and thus offer our customers a product of the highest quality and safety.

We have an excellent team whose goal is to satisfactorily meet our customers' needs, making EXOJO a benchmark in the ducting sector in Spain. Our values are the quality of our products and speed of service. We have modern facilities that have improved our structure and production capacity, adding a plus to our products and our brand image.

All this has been achieved thanks to the fact that one of our key objectives, since 2001, has been to operate at the level established by the international standard UNE-EN-ISO 9001:2015. To continue our progress, ensuring the conformity of our products with regulatory requirements and customer specifications, in 2015 we obtained the Certificate of Product Conformity and Factory Production Control Conformity in accordance with Construction Products Regulation (EU) 305/2011 of the European Parliament and of the Council of 9 March 2011, from the notified body KIWA Cermet Italia SpA.

To maintain our prestige at the national level and gain market share in other countries, management is committed to establishing the necessary processes and providing the necessary material and human resources, and to continually improving the effectiveness of our Quality Management System.

Quality is a goal and responsibility of all EXOJO staff. Therefore, management pays particular attention to raising awareness among all employees through communication and explanation of this Quality Policy, the Quality Objectives established annually, their contribution to the effectiveness of the quality management system, and the consequences of non-compliance with its requirements.
